The effective date is the date, supplied by CMS, upon which the facility began receiving cost-based reimbursement from Medicare as a CAH.

Number of acute+swing beds - This is the number of acute care beds (including those that can be used for swing bed status, intensive care, coronary care or other non-distinct part acute care), up to the legislated limit of 25. It should not include those beds used for observation status only, distinct part skilled nursing unit, distinct part psychiatric unit or distinct part rehabilitation unit.

* These hospitals had more than 25 beds before conversion to CAH status. We do not have post conversion bed count numbers for these hospitals but assume that the number of beds would not drop below the CAH maximum of 25 allotted beds.
